### *Monthly Jobs Report*

### **Revised February and March Preliminary Jobs Figures Released**

INDIANAPOLIS (April 18, 2006) – The number of jobs in Indiana is now 20,900 higher than this time last year while the seasonally-adjusted employment total increased by 5,600 jobs from February, according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised February total of 2,963,700 jobs while preliminary figures for March indicate 2,969,300 jobs.

"Looking at the recent historical trends of our jobs, employment and unemployment data, it is clear that while we are moving in the right direction, we still have significant challenges ahead," said Ron Stiver, Commissioner of the Department of Workforce Development.

#### **Seasonally Adjusted Figures**

The nation's seasonally adjusted figures for March show that U.S. employment gained 211,000 jobs during the month and 2.1 million over the year. The monthly gain was credited to continued strength in health services and professional and business services. Construction was unusually weak while manufacturing was the only sector to lose jobs.

Meanwhile, Indiana remains approximately 44,600 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to February revised data was 2,963,700, whereas March preliminary figures were 2,969,300.

Compared with last year, the sectors with the largest increases in jobs were service providers including professional and business services, leisure and hospitality, and education and health services.

#### **Non-Seasonally Adjusted Figures**

Indiana's March preliminary non-seasonally adjusted payroll estimates indicate 2,954,100 jobs for the state, while February's revised total reported 2,935,600 jobs. Most sectors posted modest over-the-month gains that were in line with recent trends.

#### **Non-Seasonally Adjusted Metropolitan Statistical Areas**

Preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for March, with last month's and last year's job numbers:

<b>MSA</b>	<b>Mar 06</b>	<b>Feb 06</b>	<b>March 05</b>
Anderson	44,900	44,400	44,400
Bloomington	82,000	82,200	81,900
Columbus	43,200	42,800	42,400
Elkhart-Goshen	129,300	128,400	128,100
Evansville	178,300	176,900	178,000
Fort Wayne	214,600	211,600	210,100
Gary	277,100	275,600	273,300
Indianapolis	883,100	877,100	875,500
Kokomo	46,900	46,500	48,100
Lafayette	94,000	93,600	91,300
Michigan City	47,200	47,000	46,200
Muncie	52,500	52,400	53,000
South Bend	147,100	146,500	145,100
Terre Haute	74,100	73,800	73,800

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

**Note to Media:** Two companies within the Leisure and Hospitality sector misreported data in the January 2006 figures. These figures caused the numbers for this particular industry sector to be overstated for January, which impacted both January revised and February preliminary figures released by the department March 17, 2006. Additionally, the misreported figures were sent to the U.S. Bureau of Labor Statistics and published in their data on March 30, 2006.

As soon as the error was discovered, the department made the necessary revisions, and updated both the state labor market website (<http://www.in.gov/dwd/inews/lmi.asp>) and worked with Bureau of Labor Statistics officials to update the federal website. The revised January 2006 jobs figure is 2,960,100 (5,800 fewer than reported March 17, 2006) and the February 2006 corrected figure is 2,961,600 (6,900 fewer than reported on March 17, 2006). The figures included in this release were calculated based on the correction to the data.

**Technical Notes:**

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12<sup>th</sup> of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For most accurate analysis, please use revised data sets and not preliminary estimates.
